

# AF Welding Capabilities Statement

## Who We Are

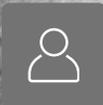

AF Welding & Manufacturing is a full-service fabrication company specializing in mobile welding, precision HD Plasma, and industrial finishing. We deliver custom, code-compliant metal solutions built to perform in demanding environments – from agriculture and manufacturing to energy and infrastructure. Our certified team combines craftsmanship, technology, and reliability to keep your projects moving with precision and speed.

## Why Choose Us

### Deep Industry Experience

Our team brings decades of hands-on expertise across fabrication, field welding, and industrial manufacturing – delivering proven solutions that work in the real world.

### Safety & Quality is our Promise

Every project is executed with uncompromising safety, strict adherence to AWS, ASME, and API welding standards, and a disciplined approach to risk prevention. Our team delivers code-compliant craftsmanship supported by thorough safety practices and rigorous inspection from start to finish.

### Rapid Value Creation

From concept to completion, we move fast without compromising quality – reducing downtime, accelerating delivery, and keeping your operation running at full strength.

## Core Competencies

### Welding Services

- Certified mobile and in-shop welding
- Structural steel, stainless, and alloy fabrication
- AWS D1.1, ASME Section IX, and API 1104 compliant
- ASME B31.3, AWS, R Stamp
- Field repairs, installations, and custom assemblies
- Precision MIG, TIG, and Stick welding

### NAICS Codes

- 332312 – Fabricated Structural Metal Manufacturing
- 332322 – Sheet Metal Work Manufacturing
- 332710 – Machine Shops
- 238190 – Other Foundation, Structure, and Building Exterior Contractors
- 811310 – Industrial Equipment Repair & Maintenance

### Industries Served

- Salt mines, salt processing plants, and mineral operations
- Oil & Gas
- Manufacturing & industrial production
- Construction & infrastructure
- Energy, carbon capture, and emerging technologies
- Transportation, logistics, and equipment repair

### Other Services

- HD plasma cutting for precision custom parts
- Plate rolling & forming for cylinders, cones, and curved components
- Powder coating and industrial finishing
- Custom metal components & prototyping
- Modular skid fabrication
- Equipment repair, refurbishing, and retrofitting
